

CARLOS JESÚS BORGES MILIÁN

AIM Achieve inclusion in a work environment that imposes challenges to achieve constant improvement, both from a professional and personal point of view.

KNOWLEDGE Knowledge of relational databases, experience using MySQL.
Mastery of programming languages such as Java Script, PHP, C#.
Experience with development environments such as Node.js.
Experience in working with different Frameworks such as Angular, React js, Laravel and Svelte.
In the React.js ecosystem I can work with both class components and functional components with hooks.
Mastery of version controllers such as GitHub and GitLab.
Knowledge of website layout and design through the use of HTML, CSS, Flex-Box CSS, Java Script and the use of the Figma tool.
A level of Medium English.
I received training in Software Engineering with agile methodologies such as Scrum.

EXPERIENCE **DEVELOPER OF THE APPLICATION FOR THE MANAGEMENT OF THE POST-GRADUATES OF MY UNIVERSITY**
2019-2020
As a stop to my study completion process, I developed this application where I was able to put all my knowledge about web development into practice.

TRAINING **UNIVERSITY OF MATANZAS-MATANZAS (CUBA)-INFORMATIC ENGINEER**

COMMUNICATION I have great communication skills, I consider myself an extroverted and proactive person. I love new challenges that make me leave my comfort zone. I can easily integrate into projects due to my ability to work as a team.
